Your participation is voluntary and your answers will be completely confidential. However, in the event of a participant stating that they are going to harm themselves or others, information will be reported to the appropriate authorities.

The interview covers other people’s drinking and its effects on you. As with in the 2008 interview, it includes questions about your well-being and relationships, as well as some basic information about you such as age education and occupation.

IF NECESSARY: For example, you will be asked about the drinking of those close to you and whether this has negatively affected you in some way.

You do not have to answer any questions you don’t want to and you are free to withdraw from the study at any time. Your answers will be stored anonymously, in secure, confidential files.

Eastern Health Research and Ethics committee has approved this study.

IF NECESSARY: If you have any concerns about this research, please call the Chair of the Eastern Health Research and Ethics Committee. The number is (03) 9895 3398. The reference number for this project is E16/1112.
